## 1 convert fahrenheit into celsius

```
#include<stdio.h>

int main () float fahrenheit,celsius;

printf("enter the fahrenheit:");

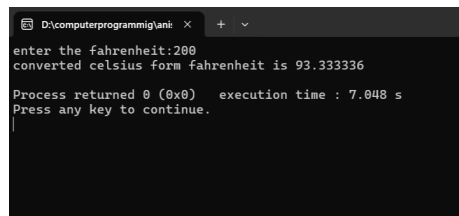

scanf("%f", &fahrenheit);

celsius = (fahrenheit-32) * 5/9;

printf("converted celsius form fahrenheit is %f\n", celsius);

return 0;
```

## 2 output

```
D:\computerprogrammig\ani x + v
enter the fahrenheit:200
converted celsius form fahrenheit is 93.333336
Process returned 0 (0x0)   execution time : 7.048 s
Press any key to continue.
```
