## 1 convert grams into kilograms

```
#include <stdio.h>

int main() float grams, kilograms;

printf("Enter the weight in grams: ");

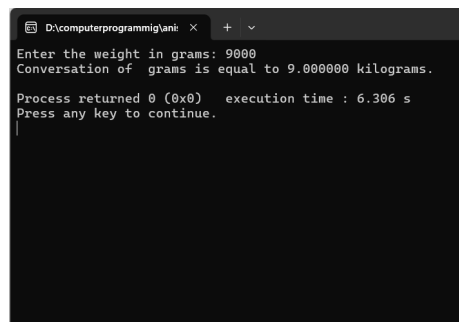

scanf("%f", &grams);

kilograms = grams / 1000;

printf("Conversation of grams is equal to %f kilograms.\n", kilograms);

return 0;
```

## 2 output

```
D:\computerprogrammig\ani >
Enter the weight in grams: 9000
Conversation of grams is equal to 9.000000 kilograms.
Process returned 0 (0x0)   execution time : 6.306 s
Press any key to continue.
```
